**Paper Plate Butterfly
 Puppet Craft**

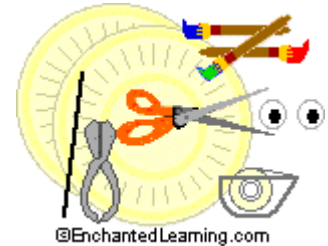

[More Kinder Crafts](#)

A simple-to-make paper plate butterfly puppet. Each butterfly is made from two paper plates taped together.

Supplies needed:

- Two paper plates
- Scissors
- Tape (colored tape looks really nice but is not necessary)
- Paint, markers or crayons
- Pipe cleaner
- Hole punch
- Optional - googly eyes, glue

	<p>Fold a paper plate in half (fold it so that the back side of the plate is touching itself).</p>	
	<p>Using another paper plate, cut out a strip of the plate from the middle (discard the middle strip).</p>	
	<p>Tape each of the the half-round pieces you just cut onto the folded plate (or you can staple them together). Position them so that the eating surfaces of the plates are facing each other - tape along the round edges only.</p> <p>This will form two pockets where you will later put your fingers and control the puppet.</p>	
	<p>Draw a butterfly on your puppet. Punch two holes towards the top for the antennae, and loop a pipe cleaner through the holes (to be</p>	<p>Back</p>

the antennae).

Optional: Glue on googly eyes.

You now have a great butterfly puppet that flaps its wings (with a little help from your hand).
